

WARNING CBC.T

Do not use any glue with temperatures above 210° Celsius / 410° Fahrenheit nor glue with temperatures lower than 180° Celsius / 356° Fahrenheit. This machine will only work correctly if the proper glue is used. Proper glue should have an average temperature between 180° to 210° Celsius / 356° to 410° Fahrenheit and be pellet glue.

We recommend the following glues:

• **Jowat (ref. 288.60)**
Process Temp 180 - 200° C

• **Kleiberit (ref. 773.3)**
Process Temp 180 - 200° C

Any brand of pellet glue with temperatures between 180° to 210° Celsius / 356° to 410° Fahrenheit

You can use glue from other brands as long as it has an application temperature rating between 180° to 210° Celsius / 356° to 410° Fahrenheit and as long as it is pellet glue. **Damage as a result of incorrect glue may result in the warranty being voided.**
