

## GLUE GUIDE

**CBC FLEX | CBC.E | CBC.MR | CBC/2.MR**

To ensure proper machine performance, **only pellet glue with an operating temperature between 130°C and 180°C (266°F to 356°F) should be used.**

Do **not** use glue with temperatures **above 180°C (356°F)** or **below 130°C (266°F)**. Using glue outside this range may prevent the machine from operating correctly and can cause damage.

**⚠ Important:** Damage caused by the use of incorrect glue may result in the warranty being voided.

### Recommended Glues

For best results, we recommend the following pellet glues:

White color (ref. 282.21)

Natural color (ref. 282.20)

Ivory color (ref. 788.3/20)

White color (ref.788.3/10)

**Any other pellet glue brand**  
that meets the required temperature range of  
**130°C to 180°C (266°F to 356°F)**

### Need Assistance?

If you have questions about glue compatibility, setup, or operation, please contact our **Technical Support Team**. Our specialists are ready to help you select the correct glue and ensure optimal machine performance.
